

Dear Valued Patient,

Your health and well-being is very important to us. We have been closely monitoring and planning our response to COVID-19 based on recommendations from Federal, State and Local Authorities. Effective Wednesday, March 18 we will be closed for all non-emergent care. This change is temporary – we anticipate being able to return to normal operations in early April.

If you are experiencing a dental emergency such as severe toothache, swelling of your gums, face or neck, bleeding in your mouth that does not stop, infection, a potential infection, trauma such as a broken tooth or are unsure if your situation requires immediate attention, please contact our office to discuss arrangements for your care.

We are currently working diligently to organize our processes for rescheduling appointments that were impacted by this closure and will keep you updated as we know more. We look forward to continuing your dental care when we resume normal operations and will contact patients to reschedule any appointments that may have been impacted by the closure as soon as we are able. In the meantime, please feel free to call our office if you have any questions.

Thank you
